## DETAILED ACTION

### *Drawings*

The drawings are objected to because of the following reasons:

The lead lines of numerals 8 and 22 in figure 3 are incorrect.

Numerals 55a, 56a and 53b are not shown in figure 1.

In figure 1, several numerals are incorrect and/or reversed. That is, numeral "54a" should be --53a-- and adjacent numeral "54b" should be --53b--. Numeral "53a" should be --54a--.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: Numeral 67 as shown in figure 9(a).

A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Specification*

The disclosure is objected to because of the following informalities:

On page 2, line 5 from the bottom, "diffusing" should more correctly read --diffusion--.

On page 8, lines 6 and 8, "flown" should read --blown--.

Art Unit: 3746

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Ansart et al. Ansart et al. disclose a gas turbine combustion chamber having a plurality of modules (one module is shown in figures 2 and 3), each module having a plurality of fuel nozzles 19A, 19B and air holes 24A, 24B. The air and fuel are jetted into the combustion chamber as a plurality of coaxial flows.

***Allowable Subject Matter***

Claims 12 to 14 are allowed.

***Information Disclosure Statement***

The information disclosure statement filed September 9, 2003 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has
